About myself

Hello! I am currently a Year 3 NUS student majoring in Life Sciences. Prior to entering university, I studied Biomedical Sciences at Singapore Polytechnic. My hobbies include photography, videography, and watching films (currently watching Tulsa King!). If you are interested, I have a photography IG account (@mbe.z) but I haven't been updating it recently because of school... I will be participating in the Student Exchange Program at the University of Sydney in the next semester, and I am excited to get back into photography and perhaps videography!
